

Bowling with style.

Furniture Catalogue

FURNITURE CATALOGUE

At Switch®, we are proud to have a line of products that is centered on aesthetic and functional design, as well as high-end quality materials.

This is true of all our Bowling material as well as all our furniture ranges. Starting with our Original Series, Pininfarina designed furniture which is available in silver, red and yellow, Switch® brought the Bowling world its first taste of true style in furnishings. We continue to innovate and have developed new and practical solutions for all bowling centers.

Now, our furniture range has been extended to include the Puzzle Series and the latest 'Equinox' Series.

Switch® offers a cornucopia of style and choice, suitable for every layout and design. All Switch® furniture material is manufactured with certified fire retardant materials, including Eco Leather, and are built on solid metal frame constructions. This allows for longevity, durability as well as eye-popping style.

A large variety of color combinations are available with selected models of Switch® furniture, in particular with the Puzzle Series which can be modulated to suit any environment. The entire range of Switch® furniture is suitable for not only the bowling approach areas, but also for reception areas, waiting areas and games areas too.

The full Switch® range of furniture ranges are all manufactured to the highest quality international standards and regulations. Is it time to remodel your center? Then, it's definitely Time to Switch®!
